

About

We are a general contracting service based out of Edmonton Alberta, servicing the oil and gas industry's upstream construction needs in Western Canada. As a general contractor, we complete field installations of oil and gas facilities.

Services

GMC Contractors' scope of construction services encompasses the full range of project development from project management to all aspects of construction for all facilities. We offer a complete base of construction services to provide total turnkey, civil, mechanical and piping projects for any region.

Facilities

We offer the construction of the following facilities, but are not limited to:

- Oil Batteries
- Gas Plants
- Compressor Stations
- Satellites Installations
- Water Flood Projects
- Pump Stations
- Sulphur Trains
- Metering Stations
- Oil Cleaning Plants
- Demolition of Existing Plants
- Relocation of Existing Facilities
- Storage Facilities
- Wellhead Tie-Ins
- Installations of Gathering Lines

Shop Fabrication

As an additional service provided to the oil and gas industry to compliment our facility construction services, we offer shop fabrication and assembly of the following but are not limited to:

- Piping Spools
- Pipe Supports
- Platforms
- Modularized or Skidded Equipment

Types of Contracts

We are prepared to submit the following types of contracts:

- Fixed Price
- Cost Plus
- Target Price
- Lump Sum
- Force Account
- Unit Prices

GMC Contractors understands the need for total commitment to the highest quality of workmanship and completion of projects within schedule. Through our in-house computer facilities, we are able to provide the latest and most up to date techniques to support and enhance our construction services, providing high efficiency and tight control on all aspects of projects.

The key to a *successful* safety program

...is communication, between owner and contractor. With Pre-Job, TailGate and Safety Committee Meetings, good communication is achieved.

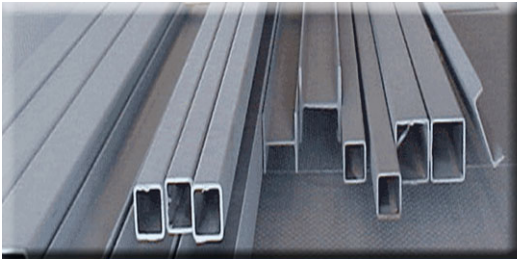

Safety

The Management of GMC Contractors endorses a strong and active Safety Program.

In our experience; we have found that establishing a positive attitude toward safety encourages employee participation in the Safety Program. Employee feedback is essential and is monitored to ensure that the program is effective and relevant. We encourage every employee to be aware of his own safety and that of his fellow workers.

Methods we ensure an effective safety program:

- Pre-Job Safety Meeting
- Pre-Job Work Plan
- Safety Committee Meeting
- Weekly TailGate Meetings

Quality Assurance - Quality Control

Large projects have a full time quality control inspector supervising quality checks. Smaller projects have the test and inspection plan established with you prior to starting work.

Quality

GMC Contractors is totally committed to the need for workmanship of the highest quality, completion of projects within schedule and the practice of cost-effective contracting and management techniques.

The strength of this commitment is based upon highly experienced personnel and on our proven systems, all of which are directed through sound business practices.

Upon project completion, the owner will receive the completed quality control package with all quality assurance documentation set out in the test and inspection plan.

Certificates

Certificate of Authorization, Quality Control Program for BC, AB and Sask
Health and Safety Certificate of Recognition
